ENVIRONMENTALLY FRIENDLY PRODUCTS

The greatest threat to our planet is the belief
that someone else will save it.

Robert Swan, Explorer

HELPING YOU ACHIEVE YOUR GREEN GOALS

At Harrison Group we are committed to reducing our impact on the environment and have expanded this mission to help like-minded customers do the same. We are working to develop a wide range of environmentally friendly alternatives to our best selling products. Here is an overview of our current environmentally friendly product options:

FOAMLINE™

The PVC-free alternative to Foamex

Use for: Temporary Signage

This PVC-free display solution does not compromise on quality. In fact, not only is Foamline better for the environment, it is stronger and more rigid than Foamex. The thinner Foamline sheets perform much better than their Foamex equivalents. It also has a scratch resistant surface, which is perfect for high traffic areas at mass participation events, and helps keep your graphics looking their best.

- 25% stronger and 30% less brittle than Foamex
- Wider temperature tolerance
- Totally opaque for double sided printing
- Scratch resistant
- Thinner for easier handling
- Longer lasting and easier to store

Fire Resistant

100% Recyclable

High Quality Print

Chemical Resistant

Indoor & Outdoor Use

BUBBLE BOARD

A recycled replacement for Correx

Use for: Temporary Signage, A-Boards, Bollard Covers

Made from 25% recycled content and 100% recyclable, Bubble Board is an excellent choice when considering the environment. Due to its cellular structure Bubble Board is lightweight yet exceptionally rigid and, unlike Correx that has fluted walls, it will not bend or crease when subjected to high winds or other pressure. It has a good resistance to impact and won't chip or mark, making it perfect for high traffic areas and its matte white surface allows for excellent print quality and enhanced vibrancy.

- Lighter than Correx
- Chip and mark free
- Not fluted - can withstand winds and pressure

Fire Resistant

100% Recyclable

High Quality Print

Indoor & Outdoor Use

ENVIROFLAG™

Knitting PET into Polyester

Use for: Flags, Feather Flags

Made from recycled plastic from items such as PET bottles, and industrial polyester waste which has been melted down into chips, then spun into yarn that is knitted to form a material.

Enviroflag™ has the same durability, strength and versatility of its knitted polyester equivalent but with a much lower environmental impact.

- Durable
- Strong
- Versatile
- Meets OEKO-TEX® 100 standards
- Manufacturing process creates 75% less CO₂ emissions than virgin polyester

Polyester Yarn

GEOMESH™

A plastic free alternative to PVC Mesh

Use for: Scrim, Roll Out Branding, Large Format Printing, Barrier Jackets

Made from 100% polyester, this innovative, 100% recyclable, patented fabric is a plastic-free alternative to PVC mesh. Geomesh is lighter (230gsm vs 380gsm) and softer than the PVC alternative, making it easier to transport and reducing its carbon footprint. Unlike PVC mesh, it is scratch resistant making it much easier to work with and it can be folded without damaging the product - perfect for transporting to and from events and storing away when not needed.

- Lighter and softer than PVC Mesh
- Scratch resistant
- All weather
- Environmentally friendly printing
- 100% recyclable
- Mesh design is wind permeable

BRAVURA™

The end of single use displays

Use for: Marketing Displays, Step & Repeat Boards

With the ability to replace the graphic sleeve with new artwork, the Bravura Display can be used time and time again making it much more environmentally friendly than a one use roller banner. The easy to assemble, lightweight framework and feet are made from recycled aluminium and plastic which can be recycled again. The graphic sleeve can be recycled with textile waste or returned to us as part of our Fabric Upcycling Scheme.

- Various sizes available
- Re-usable
- Striking design
- Double sided print
- Part of the Harrison Fabric Upcycling Scheme

FABRIC UPCYCLING SCHEME

Use for: Giveaways & Furry Friends

We are proud to be the first UK supplier to offer fabric upcycling scheme. Each year approximately 895,000 tonnes of textile waste goes to landfill. Our aim is that 100% of the fabric we print is recycled or upcycled. Therefore we ask that used flags, scrim and other fabric displays are returned to us so we can turn them back into useful items such as shopping bags, ideal for giveaways, and dog toys which we donate to our local dog welfare charities and centres.

Ask us about turning your scrim into giveaways for next year's event.
